

Debate in Medical Ethics

PRACHYAPAN PETCHUAY
Ethical and Dilemma Topics
Medical Ethics
School of Medicine

There are two teams: Affirmative and Negative

Each group is expected to participate in the research and strategy of the debate.

How we do it

1. Introduce the topic
2. Assign the Affirmative and the Negative
3. Give Time for Research
4. Keep Track of Time
5. Make a Judgment, Explanation and Conclusion
6. Q&A

*The overall purpose of **speaking** is more important than the specific outcome of the debate.*
