

Social Engagement Project

Chinese Language Delivery to School Kids by Novices Teachers

Activities

Chinese Program students prepare the lessons and teach basic Chinese speaking in school as part of the university's social engagement project. Content covers basic vocabulary and expressions, including greeting, colors, animals, numbers, days, stationery, and family.

Outcome

-School students are able to say basic sentences in Chinese language.

-School students learn Chinese words from games, songs, story videos.

-School students enjoy learning Chinese.

-Chinese Program students improve their language and teaching skills.

Impact

-The Chinese Major students participating in this study apply their knowledge to train primary school students.

Future Development of Project

- Design activities for long term knowledge retention
- Implement new teaching methods
- Compare the learning outcomes among the methods

Overview

Third year students apply their Chinese knowledge and skills learned from the class to train and teach primary school students at Chumchonmai School.

Project Goals

- To promote Chinese learning in primary school
- To provide college students with a chance to experience teaching in school.

Learning Objectives

- To enhance college students' skills in pronunciation, grammar, and vocabulary use
- To apply techniques of teaching Chinese to young learners
