

# Knowledges and Skills Integrated by Health Service Activity

**Orawan Sarakul**

School of Allied Health Sciences, Walailak University, Thailand

## Overview:

The promotion and monitoring of good health are one of medical technologist's responsibilities. The health screening services were implemented for medical technology students after studying and practicing in class. This activity was set up to promote their knowledge and skills integrated and applied to the real situation..

## Activity:

**In class:** knowledge and professional skills learning and practices

**Outside class:** Health Service Activity

## Aim and Objectives:

Students able to apply their knowledges and skills for a health service activity.

## Outcomes:

### Intended:

Students able to apply their knowledges and skills in the real situation.

### Unintended:

By observation, they are able to manage and solve the problem throughout and work as a team. Moreover, the activity increases their confidence for social engagement project.

## Future Development of Project

To stimulate the social and management skills, the project will be set up and running by students in all steps. Teachers will act as the advisers and supporters of the activity.

## Impacts

**Students**

Improve both generic and professional skills.

**Community**

Concern their health and recognize the role of Medical Technology in Healthcare system.
